

# 2012 Diabetes Health Plan Prescription Drug List (PDL)

## A benefit plan to help you save costs

Taking your diabetes medications as prescribed and monitoring your blood sugar can be critical to maintaining your health. That's why the Diabetes Health Plan makes many diabetes/diabetes-related medications and supplies available for a reduced or waived cost.

## Diabetes Health Plan enrollment and coverage

You may enroll in the Diabetes Health Plan during your employer's open enrollment process. After you enroll you will receive a post-enrollment guide with relevant information to participating and receiving benefits in the plan. To receive in-network coverage, fill your prescription at any network retail pharmacy or mail-order pharmacy using your member ID card. You can also visit [myuhc.com](http://myuhc.com)® to determine specific costs for your medications. Simply click on **Pharmacies and Prescriptions** and **Price a Medication** then follow the instructions provided.

## Eligible medications and supplies

The medications listed below are typical of those available at a reduced cost under this benefit plan. Included are medications for treating diabetes, as well as other conditions that can occur when you have diabetes. This list and associated cost savings may vary according to your specific coverage plan. Please note that this list may change throughout the year. If your current medication is not included in your plan, consider asking your doctor if one of the medications covered in your plan would be an appropriate substitute for you. You and your doctor make decisions about your treatment, including decisions about prescription medications.
