

Finding of No Significant Impact for an FHWA Project

Proposed Action: FM 3349 at US 79

Project Limits: From CR 404 to CR 395

City: Taylor

County: Williamson

State: Texas

TxDOT CSJ(s): 3486-01-008, 0204-02-034, 0914-05-211

In accordance with 23 CFR Section 771.119 and Section 771.121, the Texas Department of Transportation (TxDOT) and has determined that FM 3349 at US 79 will not have a significant impact on the human or natural environment.

This Finding of No Significant Impact (FONSI) for the Preferred Alternative is based on the final Environmental Assessment (EA) dated December 2021 and the entire project record. This decision documents the selection of the build alternative, presented in the final EA as the Preferred Alternative, which is described as:

The proposed project would widen and reconstruct Farm to Market (FM) Road 3349/County Road (CR) 101, from approximately 0.12 mile north of CR 404 to approximately 0.21 mile south of United States (US) Highway 79, into a four-lane divided roadway, with two twelve-foot travel lanes in each direction, 10-foot inside and outside shoulders and 2-foot inside and outside curb and gutter. Directions of travel would be separated by a grassy median, varying in width from approximately 250 feet to approximately 325 feet. Detention ponds would be constructed within the median just north of CR 132, requiring the 325-foot median width. Median breaks and turnaround lanes would be constructed along this section of FM 3349 to accommodate motorists needing to travel in the opposite direction.

FM 3349/CR 101, from approximately 0.21 mile south of US 79 to approximately 0.21 mile north of US 79 would be reconstructed and elevated over US 79 and UPRR by a combination of earth and retaining walls and bridges. This section of the FM 3349/CR 101 facility would have two 12-foot travel lanes in each direction, inside shoulders varying in width from 4 feet to 10 feet, outside shoulders varying in width from 7.5 feet to 13.5 feet, and one-foot inside and outside single slope traffic rails. 14-foot at-grade turnaround lanes, with 6-foot outside shoulders and 4.5-foot inside shoulders would be constructed under the FM 3349/CR 101 bridge, to accommodate motorists needing to travel in the opposite direction before crossing US 79 or UPRR. Ten-foot wide shared-use paths would be constructed along the outside of the northbound and southbound elevated portions of the roadway to safely accommodate pedestrians and bicyclists needing to cross US 79 and UPRR.

CR 101, from approximately 0.21 mile north of US 79 to CR 395 would be reconstructed to match the proposed FM 3349 facility south of US 79. It would include four-lanes with two twelve-foot travel lanes in each direction divided by a grassy median, 10-foot inside and outside shoulders and 2-foot inside and outside curb and gutter. Median width would be approximately 250 feet. Median breaks and turnaround lanes would be constructed along this section of FM 3349 to accommodate motorists needing to travel in the opposite direction.

The proposed project would construct a new local access road "jug handle" between CR 101, approximately 0.42 mile north of US 79, and US 79, approximately 0.48 mile west of FM 3349/CR 101. The jug handle would be a four-lane divided roadway with two 12-foot travel lanes in each

**Finding of No Significant Impact for an FHWA Project**

direction, a 14-foot flush median, and 10-foot outside shoulders. The length of the jug handle would be approximately 0.65 mile.

The length of the project along FM 3349 and CR 101 would be approximately 2.89 miles. It is anticipated that the project would require approximately 120.8 acres of additional ROW and 20.3 acres of a new permanent drainage easement along the west side of FM 3349 south of US 79. Displacements may consist of three residential displacements, and one commercial displacement. The commercial displacement would be of a business that is already permanently closed and was listed for sale.

A Notice of Availability of the draft EA was issued on October 5, 2021.

A Notice Affording Opportunity for a Public Hearing was published on October 5, 2021.

No changes to the draft EA were made as a result of comments received on the draft EA during the posted comment period or from comments made at the public hearing.

Public Hearing Opportunity Documentation has been prepared and is available for review on request.

The final EA, and reports contained in the file of record have been independently evaluated by TxDOT and determined to adequately and accurately discuss the need, purpose, alternatives, environmental issues, impacts of the proposed project, and appropriate mitigation measures. These documents provide sufficient evidence and analysis for determining that preparation of an Environmental Impact Statement is not required. These documents are incorporated by reference into this decisional document.

Based upon TxDOT's review and consideration of the analysis and evaluation contained in the EA for this project, and after careful consideration of all social, economic, and environmental factors, including input from the public involvement process, TxDOT hereby issues this Finding of No Significant Impact for the FM 3349 at US 79 project from CR 404 to CR 395.

TxDOT will ensure adherence and completion of all project commitments described in the final EA December 2021, Section 8.0. TxDOT will ensure that any and all local, state, or federal permit requirements and conditions are met and otherwise complied with.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried out by TxDOT pursuant to 23 U.S.C. 327 and the Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.
